

Is it possible to amend the listing description after I have applied design?

Saved From:

<https://apps.froo.com/kb/article/is-it-possible-to-amend-the-listing-description-after-i-have-applied-design-30.html>

When you apply design from Froo! Template Themes to your live eBay listings, the application will include code snippets within your item description that displays the design within your listing. When revising an item description that contains a design you should be mindful of this code within the description, as any inadvertant change of this code could cause the design not to display correctly.

To edit you description within eBay, load the listing to revise. Under the "Describe the item you're selling" section ensure that you have clicked the 'HTML' tab, this will allow you to view all the code that is within your listing and help you avoid removing any of the code inadvertantly.
