---

Froo! Template themes has be made to apply design to your live listings, this way it doesn't matter which listing tool you use, you can still use this application to apply design.

Froo! Template Themes does not automatically apply design to new listings, but you can return to the application and with a few clicks you can have design on each of your new listings, this also gives you the advantage of being able to choose different designs each time you return to the app.
